Anterix Unveils New Brand at DISTRIBUTECH 2026, Showcasing the Next Evolution of Utility-Led Grid Connectivity

February 3, 2026

New identity reflects Anterix's expanded role unifying spectrum, deployment solutions, and ecosystem partners to accelerate time-to-deploy and measurable utility outcomes

WOODLAND PARK, N.J., Feb. 03, 2026 (GLOBE NEWSWIRE) -- Anterix (NASDAQ: ATEX) today announced a series of live demonstrations, collaborations, and industry engagements at [DISTRIBUTECH 2026](#), where the company will unveil its new brand and visual identity. The rebrand reflects Anterix's growth focus: pairing its licensed 900 MHz spectrum foundation with deployment solutions and ecosystem capabilities, helping utilities move faster from design to deployment to measurable outcomes.

At DISTRIBUTECH, Anterix will be joined by utility leaders already deploying private wireless networks using Anterix's 900 MHz spectrum, along with more than 125 technology companies in the [Anterix Active Ecosystem](#) (AAE). Together, they will showcase how private wireless connectivity provides the foundational infrastructure to unify data, devices, and intelligence across the grid, enabling real-time visibility, operational control, and long-term resilience that delivers tangible value to utilities and the communities they serve.

"Connectivity is what makes grid modernization real, turning data into action and innovation into outcomes," said Heather Martin, Chief Marketing Officer and Chief of Staff at Anterix. "Ultimately, this is about enhancing grid value for utilities and their customers, through more reliable operations, stronger resilience, and better service at scale. Our new brand is a mark of momentum – ascending lines that reflect how we help utilities move from spectrum to deployment, and from deployment to measurable outcomes, faster."

DISTRIBUTECH, the nation's largest electric transmission and distribution conference, takes place February 2–5, 2026, in San Diego. In booth 1028, Anterix will be joined by utility partners including Evergy, Lower Colorado River Authority, and Xcel Energy where they will discuss the innovative ways they are deploying solutions using Anterix 900 MHz private wireless broadband. Attendees can also experience live demonstrations and real-world use cases that show how private wireless broadband networks enable utilities to:

- See and control more of the grid in real time.
- Streamline site readiness and enable early device activation and connectivity with TowerX™ and CatalyX®.
- Harden infrastructure and strengthen response to storms, wildfires, and other high-impact events.
- Enhance worker safety and field efficiency with faster, more reliable access to critical applications and data.
- Scale grid-edge innovation, including EV charging, advanced metering, line sensors, fault indicators, and additional mission-critical use cases.
- Accelerate measurable outcomes with a deployment-ready approach that compresses time-to-deploy and time-to-value.

About Anterix

Anterix is transforming how critical infrastructure stays connected. As the nation's leading connectivity partner for utilities, Anterix delivers more secure, private 900 MHz licensed spectrum and advanced intelligent infrastructure solutions that enhance efficiency, strengthen resilience, and accelerate digital transformation. Backed by a growing ecosystem of industry-leading partners, Anterix provides the connectivity foundation that powers a more resourceful and resilient future. Learn more at www.anterix.com.

Forward-Looking Statements

Certain statements contained in this press release may constitute forward-looking statements within the meaning of the federal securities laws that involve risks and uncertainties. Forward-looking statements include statement that may predict, forecast, indicate or imply future events or achievements such as statements in this press release related to Anterix's business, plans and opportunities. Any such forward-looking statements are based on the current expectations of Anterix's management and are subject to a number of risks and uncertainties that could cause Anterix's actual future results to differ materially from those implied by the forward-looking statements. These risks and uncertainties are identified and described in more detail in Anterix's most recent filings on Forms 10-K and 10-Q and in other filings that it makes with the SEC from time to time. These documents are available on Anterix's website at www.anterix.com under the Investor Relations section and on the SEC's website at www.sec.gov.
